

Trenta Carbon Fiber Storage Box Mounting Guide

This guide provides step-by-step instructions for mounting the Trenta Carbon Fiber Storage Box onto the Sprinter Rear Door Aluminum Gear Rack. Please read thoroughly before starting the mounting process.

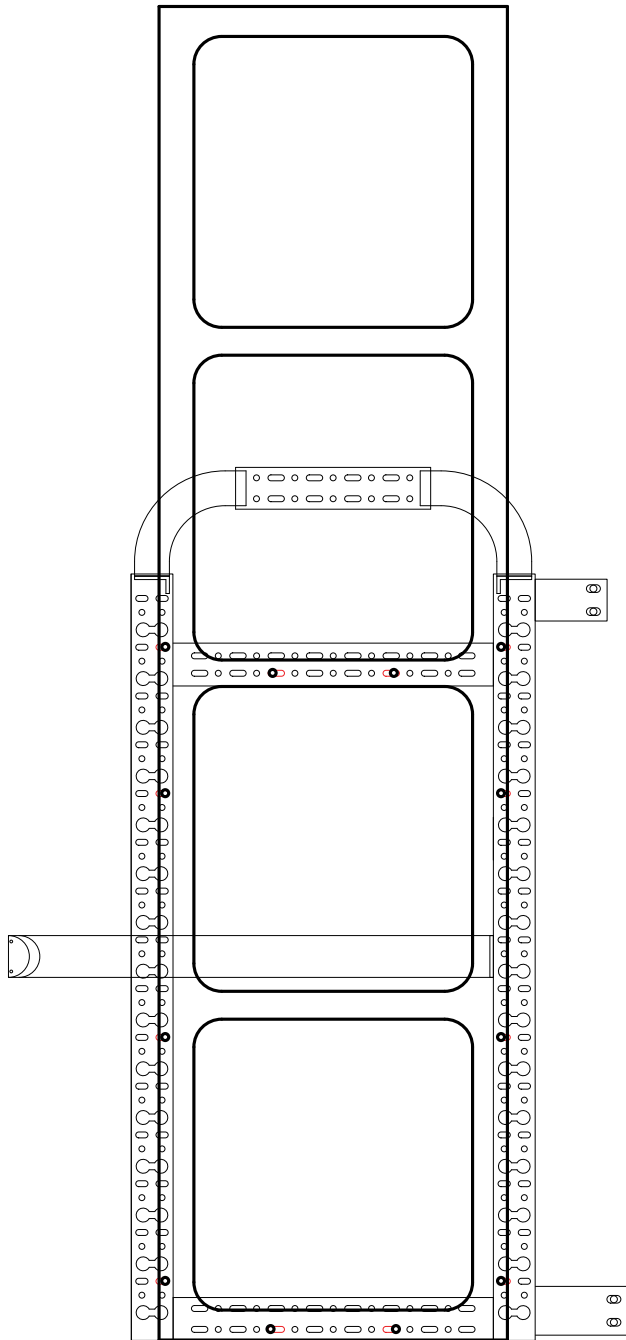

Please inspect the product and packaging upon delivery to ensure there are no issues.

Contact us immediately if the package is damaged or anything is missing.

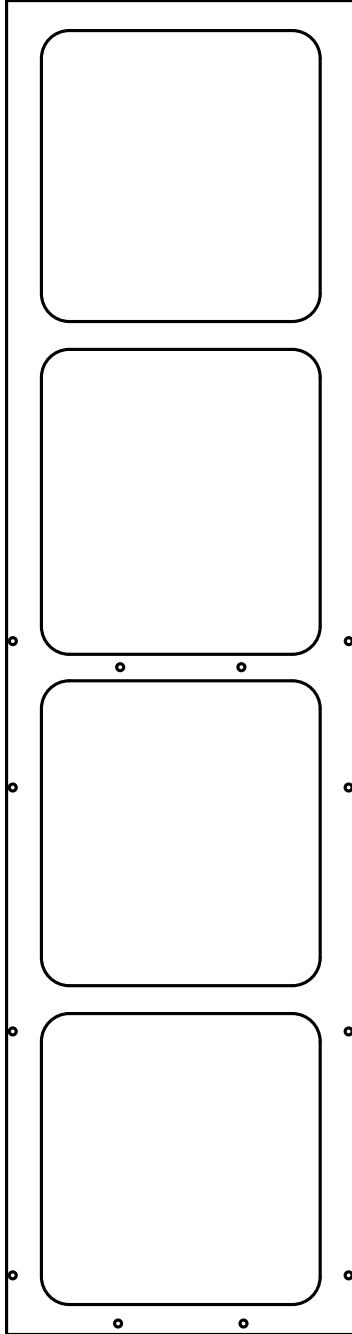

Step 1:

On the Sprinter gear rack, locate and mark the 12 laser-cut holes specified in this guide.

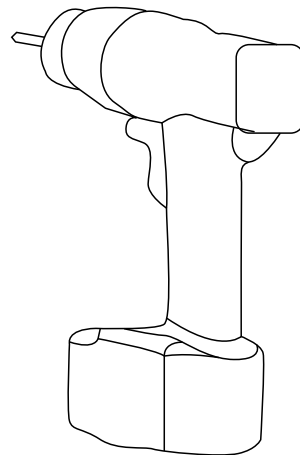

Step 2:

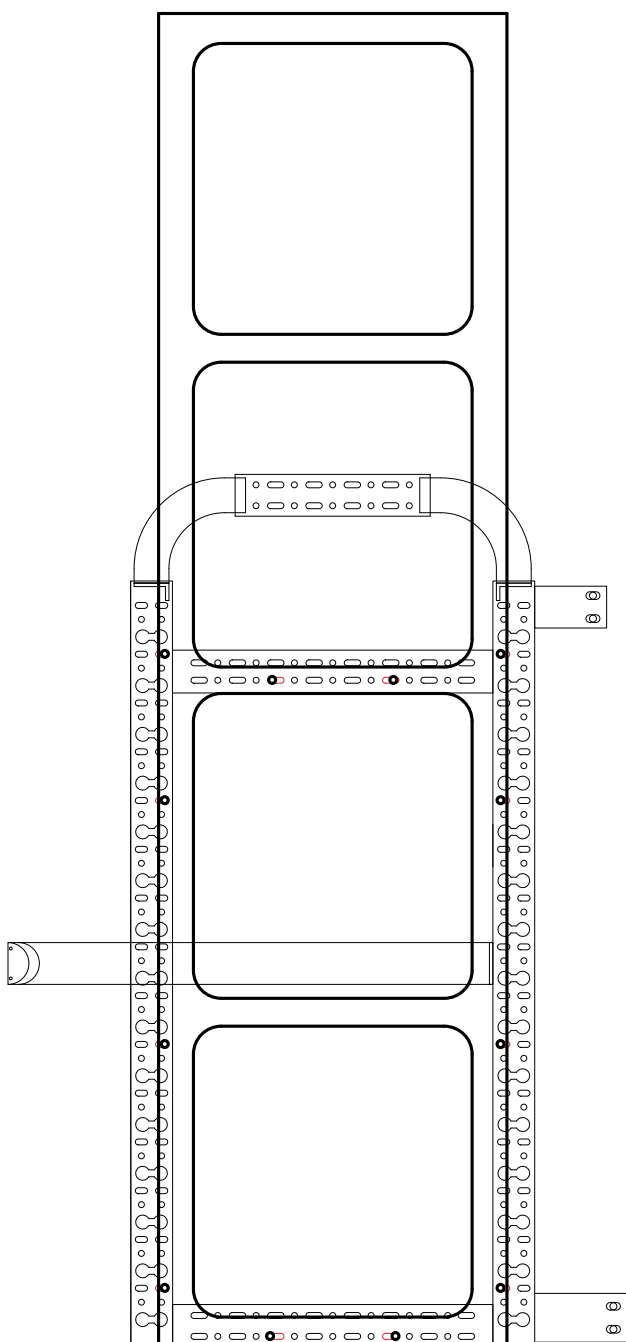

Position the storage box against the gear rack and marked the hole positions on the storage box.

Step 3:

Drill mounting holes in the storage box at each marked location.

Step 4:

Position the storage box against the gear rack again and align the mounting holes with the marked holes in the rack.

Step 5:

Insert the supplied bolts through the aligned holes, install the nuts on the back side, and tighten all hardware securely.

M8 x 30 or 5/16" x 1-1/4" Bolts
