

PROMASTER DOG PLATFORM

PARTS

A) Platform Top

B) Platform Side Support (x2)

C) Cross Support (x5)

ASSEMBLY

1. Insert one cross support into each of the three lower key hole cutouts of one of the side supports by seating the notch cutout on one side of a cross support down into each of the key hole cutouts.
2. Join the other side support to the open notches on the opposite side of each cross support.
3. Install the two upper cross supports by seating them down into the notches cut into the tops of the side supports.
4. Install the platform top. The narrow end should be installed on the taller side of the platform, wider end on the shorter side.
5. Install the assembled dog platform between the front seats of your van. The taller side of the platform with the narrower top should go towards the back of the seats.
